

HILMERSON CROWD CONTROL BARRIER SYSTEM™

VS.

OTHER CROWD CONTROL SYSTEMS

- ✓ **Construction-Grade™ crowd control system built to last 15+ years. Reuse and re-rent.**
- ✓ **Improved Security with heavy-duty base options and additional locking pin at base to prevent intentional or premeditated relocation or removal.**
- ✓ **10 ft interlocking panels install in minutes with increased coverage in less time - saves you money.**
- ✓ **Heavy duty 13g hot-dipped (inside and out) galvanized steel. Proudly made in America.**

- ✗ **Lost revenue to rental company. Lost time waiting for material, installation, and removal.**
- ✗ **Movable, vulnerable perimeters. Vandals or pedestrians can pick up and push over barricade. Unstable light-weight bases or messy sandbag bases.**
- ✗ **Typical 6.5' -8' panels have minimal coverage.**
- ✗ **Thinner gage steel or powder coated prone to rust or damage.**

**Robust Crowd Control Barrier. Control Pedestrian Traffic.
Prevent Unauthorized Access. Reduce Injury and Accidents.
Keep Workers and Visitors Safe.**

Our crowd control barrier is a secure and robust system to manage foot traffic in and around construction job sites. The opposite of an "economy" barricade, the Hilmerson Crowd Control Barrier System™ is an interlocking 10 ft. barricade made of heavy-duty 13g hot-dipped galvanized steel and is built to last in your fleet for 15+ years. Get ultimate security with our "locked" standard foot base OR versatile 70 pound weighted or penetrating bases with gravity locks.

Stop Waiting for Material. Invest, Reuse, & Re-Rent for 15+ Years.

General Contractors can now create a new revenue stream by bringing a crowd control barrier system into their fleet and managing installation and removal on their time schedules. No more waiting or throwing money away to crowd barricade rental houses. Bring crowd control barricades in house. Rent back to future projects. The versatile bases can also be used interchangeably with our construction safety rail or free-standing fence systems.
